29	30	31 				

How to use this training template:

- Warm-up before you start the workouts. The running portion is great to do before the main exercises. Check out the *Floor Mobility Warm-up* under the FLEXIBILITY tab: [On-Demand Classes - bpfittnesscenter.net](https://www.bpfittnesscenter.net)
- Perform the exercises with any of the modifications you like or plan to use for the Murph Challenge. Modification examples are available on the bpfittnesscenter.net Murph Challenge page.
- Perform the daily repetition goal in whatever way you like.

For example:

40 pull-ups
80 push-ups
120 air squats
Run/walk 2 x .75 mile

could look like:

Run/walk .75 mile

4 rounds of:
10 pull-ups
20 push-ups
30 air squats

Run/walk .75 mile

or look like:

Run/walk .75 mile

rounds of:
10,5,10,5,10 pull-ups
10,15,20,15,20 push-ups
20,30,20,30,20 air squats

Run/walk .75 mile

- You could also choose to do extra running on the days you do not train the Murph.
- No matter how you choose to train, the idea is to accumulate repetition volume in the exercises indicated.
- Cool-down and stretch at the end. Check out the Stretch Sequence under the flexibility tab here: [On-Demand Classes - bpfittnesscenter.net](https://www.bpfittnesscenter.net)
